Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Objections***

Claim 2, line 2, is objected to because of the following informalities:

“first and second ribs”, the examiner suggests --first ribs--. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 6, 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Toy.

Toy discloses a metal plate (14), first and second ribs (11), extended lips (17), a receiving device or chassis member (8) (re claims 1-4)

Re claim 6, see col. 5, line 10.

Re claim 8, see Fig 14

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 2831

Claims 5, 7, 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Toy.

The teaching as discussed above does not disclose the receiving device made of aluminum, the shielding component including a coating of tin, or the width of the gasket is 2 cm or less. It would have been obvious to one having ordinary skill in the art at the time the invention was made to use aluminum for the receiving device or a coat of tin for the shielding component of Toy, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. In re Leshin, 125 USPQ 416. It would have been obvious to one having ordinary skill in the art at the time the invention was made to select a specific size of the gasket of Toy, since such a modification would have involved a mere change in the size of a component. A change in size is generally recognized as being within the level of ordinary skill in the art. In re Rose, 105 USPQ 237 (CCPA 1955).

Claims 10-19 are allowed

The following is an examiner's statement of reasons for allowance:

The limitation "the receiving device includes slots" of claim 10, "at least one storage array module inserted into the at least one drive bay" of claim 16, " in combination with other limitations present is neither taught nor disclosed in the prior art of record.
